DETAILED ACTION

Preliminary Amendment

The preliminary amendment filed on 9/28/2005 has been entered.

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance:

As to independent Claim 1, the prior art of record taken alone or in combination, fails to disclose or render obvious a signal supply section that supplies a modulation signal having a predetermined amplitude for modulating the phase of the linearly polarized light to one of the first and the second phase modulation units, and an optical rotation angle calculation section that calculates an optical rotation angle by the sample based on the modulation signal supplied from the signal supply section and the intensity of the light detected by the light intensity detection section, in combination with the rest of the limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

This application is in condition for allowance except for the following formal matters:

- The abstract exceeds 150 words.

- On page 4 of the specification, line 7, the number of the Japanese Application appears to be incorrect, since the number corresponds to a different invention. Correction is required.
- The examiner advises to change the dependency of claim 3 from "1 or 2" to only 2, because such change would eliminate the antecedence problem of "the offset signal" in Claim 15.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
